

## **Aditro AB moves to Open Source with COBOL-IT**

**Helsinki, March 20, 2013 - Aditro AB moves to Open Source with COBOL-IT.**

Aditro AB has integrated the COBOL-IT solutions into the Aditro Affärslösningar Software product. FSC Ltd, and their Finnish Support Center will provide Aditro with the COBOL-IT Compiler Suite Enterprise Edition, COBOL-IT Developer Studio, Cobol-IT Precompiler for MS SQL Server and Cobol-IT XML Solutions.

Aditro serves more than 12,000 clients and helps them improve their business processes in HR, payroll, economic management and information logistics. With more than 1,300 full-time employees in four different countries, Aditro is a rapidly growing company.

Aditro's Products and Services are used by medium-sized and large companies and organizations in private and public sectors. Aditro makes the workday easier so their clients can focus on their key business.

COBOL-IT provides COBOL Solutions for the Enterprise Solution Stack in Open Systems. The COBOL-IT Product Suite, and Customer-Oriented Support provide high value, and have been proven on the most challenging migration projects.

FSC Ltd is an IT Service Company that specializes in the modernization of Enterprise Application systems. FSC Ltd delivers COBOL-IT solutions in Finland and in the other Nordic countries.
