

Pepsico Iberia moves from Micro Focus to COBOL-IT on Linux

PROJECT HIGHLIGHTS

Industry:

Food and Beverage

Application:

Online and Batch

COBOL-IT Solutions:

COBOL-IT® Compiler Suite Enterprise Edition

Previous Environment:

HP-UX Server
PacBase
Oracle Pro*COBOL
Oracle 8i Database

New Environment:

Enterprise Linux Server
PacBase
Oracle Pro*COBOL
Oracle 10g Database

Previous COBOL:

Micro Focus Server Express 5

Pepsico Iberia has migrated over 1500 COBOL programs from Micro Focus COBOL to **COBOL-IT**, with improvements in performance and a much lower costs.

PEPSICO

Pepsico Iberia moved their legacy application from an HP-UX operating environment to a Linux operating environment with COBOL-IT in an Enterprise Application Modernization initiative.

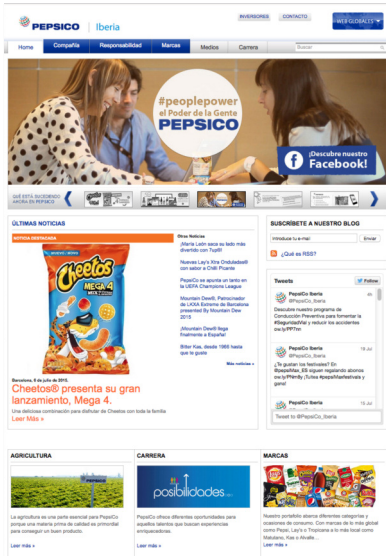

Pepsico Iberia's primary goals in moving their application to the Linux platform with **COBOL-IT** were to improve performance, and to reduce costs.

The **COBOL-IT** Compiler Suite helped them achieve both goals. The project was completed on time and achieved cost savings of close to 50%.

A leader in the Convenience Foods & Beverage Industry

Pepsico Iberia is an industry leader in consumer products focused on convenience foods and beverages. **Pepsico Iberia** has production centers in Burgos, Murcia, Lobon, Carregado, Seville, Echavarri, Tafalla, and Mallorca.

Together they produce and sell the company brands, which include Lay's, Ruffles, Doritos, Pepsi, 7-up, Gatorade, Tropicana and Alvalle.

Pepsico Iberia Website

A need for for a higher value COBOL solution

Pepsico Iberia was undertaking a modernization initiative, and looking for opportunities to increase performance and cut costs.

The **Pepsico Iberia** COBOL application consisted of 1500 COBOL programs, and was being maintained using Micro Focus Server Express.

The costs associated with continuing to maintain their COBOL application with Micro Focus Server Express were incompatible with their budget constraints, so **Pepsico Iberia** elected to evaluate other solutions.

The **COBOL-IT** Compiler Suite Enterprise Edition provided the highest value in terms of performance and cost, and was selected.

The Pepsico Iberia Application

The **Pepsico Iberia** application consists of 1500 COBOL programs, about half of which were generated by an IBM Pacbase code generator. Working with the **COBOL-IT** team at Grupo SAME in Barcelona, Spain, **Pepsico Iberia** completed the migration in less than 3 months.

Price, performance, and time-to market

"The value proposition of **COBOL-IT** is a combination of price, performance, and time-to-market.", said **Stephane Croce**, CEO of **COBOL-IT**. "On these measures, **COBOL-IT** consistently rates as the highest value, lowest risk solution on the market."

Challenge/Solution/Customer Benefit matrix

Challenge	Solution	Customer Benefits
Cost increases projected to rise to unacceptably high levels.	Migrate Pepsico Iberia software from Micro Focus COBOL to COBOL-IT.	Savings of close to 50%.
Limit costs associated with migration	Choice of ISO-standard COBOL-IT compiler, compatible with Pacbase-generated COBOL source code.	Minimize complications in recompiling, completing migration in 3 months.
Replicate all functionality, with equivalent or better performance.	Modernize on Enterprise Linux Server with COBOL-IT.	Lower costs, and better performance.
